RE: Full Price Display Enhancements
(Lighted System III Kit)

Gentlemen:

Everyone has received FSC-317-C (attached) outlining the new System III Display Enhancement Kits now available.

We are constantly trying to get impactful displays that "talk to consumers" to get our message across and these kits do the trick! The enhancement kits are made for those displays that have access to an electrical outlet and really have impact in the cleaner, less cluttered calls.

These enhancement kits are currently available and the ROU is ready to take your order.

Sincerely,

Mark

M. A. Young
